	3-3 Management of material topics: Local communities	The Gym Group plc Annual Report and Accounts 2023, pp 40-41, 68; https://www.tggplc.com/sustainability/strategy
	413-1 Operations with local community engagement, impact assessments, and development programs	<p>Community engagement takes place at a local gym level. Participation is driven by the individual gyms working with local community organisations, whether through corporate partnerships, supporting fitness and wellness awareness events with local organisations, or fundraising for local charities through in-gym fitness initiatives or charity collections. Currently, there is no central collation of data to report on the impact of these initiatives.</p> <p>At the end of 2023 we launched our new partnership with NHS Charities Together, which will support our future fundraising and support for our local communities. The partnership will also enable us to measure the contributions and impact of initiatives delivered through this.</p>
	413-2 Operations with significant actual and potential negative impacts on local communities	<p>Environmental / Amenity Matters:</p> <p>The 24-hour use of TGG operations has the potential to impact our local communities. TGG employs consultants to assess the existing environment and the proposed use. TGG and its consultants develop mitigation measures to ensure the proposals have no unacceptable impact and align with the required planning policies and British Standards. The planning application process provides for reviewing and confirming the proposals to ensure compliance. Where operational issues do arise, TGG and its consultant team work with the local Environmental Health Officer and/or local representatives as relevant to review and address any problems.</p> <p>Across our 233 open gyms, less than 3% have some acoustic concerns; we anticipate that most of these will be resolved throughout H1 2024.</p> <p>We have continued to work with our landlords, neighbours and local authorities to reduce the impact of our gyms on the local environment. In most cases, we have removed the problem by relocating equipment or installing simple acoustic attenuation devices. In 2023, we removed slam balls and battle ropes in our Horsham gym in response to acoustic issues.</p> <p>As part of our ongoing refit programme, we take the opportunity to review any acoustic issues when refitting the gym. In 2023, we installed improved acoustic measures in Hounslow as part of a refit.</p>
